**SERVICE : POWER SUPPLY: 380 V THREE-PHASE, 50 HZ**

**DIMENSIONS : 1500 X 700 X 1750 MM**

**WEIGHT : 160KG**

## REFERENCE : MP413

The tablet is used to formulate drugs to facilitate the absorption of active ingredients and dissolution in the stomach.

This machine has been designed for the production of tablets by compression of any granular powder. It can be used for research and development and small-scale production.

It can also operate manually by means of a wheel equipped with a crank.

Only one set of punches is provided, the filling depth and the thickness of the tablets can be adjusted.

### Technical specifications :

- Maximum pressure: 15 Kn
- Maximum diameter of tablets: 12 mm
- Maximum depth of filling: 11 mm
- Maximum thickness of tablets: 6 mm
- 250 W motor
- Tools: a set of punches
- Electrical box with security
- Mounted on aluminum chassis with wheels and guard with door
- Supplied with tools: a set of punches
