

CREMONE LEVER

Non contractual photo

SERVICE :

REFERENCE : EX2300

Lever espagnolette equips the semi-fixed wing of the double doors. The manipulations and the observation of the model in section with the 3D CAD files make it possible to apprehend the principal forms and proportions of the parts constituting the espagnolette. It is perfectly adapted to the study of the transformations of movements.

Technical specifications :

Proposed TP Themes :

- Visualize the internal technical functions
- Observe the transformations of movement
- Apply the tools of technical communication
- Understand and assimilate the associated technical vocabulary
- Raise awareness of conventions and graphic quality

Composition :

- A standard cremone mounted on a support plate
- Standard cremone degreased for dismantling and handling
- CD Rom with educational and technical resources (3D - SW)
